

Natalia, Higher Than The Sun

Your loves like a symphony
Your loves like epiphany
Boy you make my love life burning higher and higher
Your loves got just what it takes
A rollercoaster without brakes
And the devil in my soul it just caught fire
I get up lift my hands and my head starts spinning around
Got me high as a kite got me floating
Oooh I can't come down

You make me weak
You make me strong
You got me higher than the sun
You give me hope
You give me joy
You give me ecstasy
A brand new day it's coming on
A brand new me is taking form
You got me flying to the skies above

Your love got the best of me
Come and take the rest of me
Boy you got my body burning with desire
I get up lift my hands and my head starts spinning around
Got me high as a kite got me floating
Oooh I can't come down

You make me weak
You make me strong
You got me higher than the sun
You give me hope
You give me joy
You give me ecstasy
A brand new day it's coming on
A brand new me is taking form
You got me flying to the skies above

Every time I see you feel like
I'm on glory street
Just confess I commence I can dance
My heart is skipping a beat

You make me weak
You make me strong
You got me higher than the sun
You give me hope
You give me joy
You give me revelry
A brand new me is taking form
A jubilee of speaking tongues
You got me higher than the skies above
