

# Natalie Imbruglia, Stuck On The Moon

She took a walk on a Saturday  
And all of the people were gone  
The building were down and all the birds had flown away  
But she just kept singing her song  
Lazy days  
Just time and space  
Isn't it wonderfull

Impossible  
To believe she's the only one  
And isn't it incredible  
In the blink of an eye it was done  
She's the girl who fell out with the sun  
And got stuck on the moon

She started digging for sunshine  
And wound up with dirt in her nails  
Building her house on the edge of divine  
No wonder she never fails  
The pain is gone  
But there's no way home  
Time and space  
There's a million ways  
To feel beautifull

Impossible  
To believe she's the only one  
And isn't it incredible  
In the blink of an eye it was done  
She's the girl who fell out with the sun  
And got stuck on the moon

Nothing to prove  
And what's left to say  
When all that you know has been taken away  
Put your feet up  
Turn your troubles down  
Take everyday as it's coming around

There's a million ways  
To feel beautifull...

Impossible  
To believe she's the only one  
And isn't it incredible  
She's the girl who fell out with the sun  
Impossible  
In the blink of an eye it was done  
She's the girl who fell out with the sun  
And got stuck on the moon
