

Natasha Shneider, Here With You

Walk with me into the morning sun
Hold my hand, now I won't let you fall
The ways are trying to wash the past away
But nothing can erase the words I say

Because love never dies
No, love never dies. I love.
I saw a falling star and wished for you
And now you've made it true
Of all the dreams I long for when I wake
You're here and I'm with you
I'm with you, I'm here with you

Stand with me, embracing in the rain
Touch my lips and laughing is the same
The ways are trying to wash the past away
But nothing can erase the words I say

Because love never dies
No, love never dies. I love.
I saw a falling star and wished for you
And now you've made it true
Of all the dreams I long for when I wake
You're here and I'm with you
I'm with you, I'm here with you
With you
