

Natasza Urbańska, Shed a Light

You let me down slowly
All your bad words are on my mind
They make me feel lonely
And they finish us out of sight
It's rivalry and chemistry
Who's winning this?
Oh, I got stronger, level up
Just look at us, I'll make it up to you

You should know I want you to shine
So shed the light, please shed the light
Losing track of time, there's only darkness in your eyes
One day you will find me, don't be blind, oh, don't be blind
I want you to shine, so shed the light, please shed the light
Show me that you want me (show me that you want me)
Show me that you want me all the time
Show me that you need me (show me that you need me)
Show me that I make you feel alive
I want that you will find me
Don't be blind, oh, don't be blind
I want you to shine, so shed the light
Please shed the light

I find it myself now
And I feel like I found you too
It's a connected
Crossed the whole universe for you
It's rivalry, your chemistry
Who's winning this?
Oh, I got stronger, level up
Just look at us, I'll make it up to you

You should know I want you to shine
So shed the light, please shed the light
Losing track of time, there's only darkness in your eyes
One day you will find me, don't be blind, oh, don't be blind
I want you to shine, so shed the light, please shed the light
Show me that you want me (show me that you want me)
Show me that you want me all the time
Show me that you need me (show me that you need me)
Show me that I make you feel alive

Show me that you want me
Show me that you need me
Show me that you want me
Shed the light
Shed the light

Show me that you want me (show me that you want me)
Show me that you want me all the time
Show me that you need me (show me that you need me)
Show me that I make you feel alive

I want you to shine, so shed the light, please shed the light
