Nate James, The Message

There is something wrong with sounds today Never really captured how I feel and whatever happened to the sounds today I think they are lacking something really

Like them old school jams that kinda make you wanna dance Lose yourself in music feels so free Each time I take your stand and turn things round I want you to express yourself through music and don't hide it and just sing yeah Let's get it together Cause music and that freakness of thinking is pushing us further

Got to get up and dance got to get up and move got to send out my message to the people

Got to get up and dance got to get in the groove are you hearing my message to the people

So what's going on in life today People looking down no,they won't say what's up But we can think around and find a way keep on moving forward and dont give up,no lets go back in time back to music of my mind with stevie playing piano just for you

So what happened to the sounds today I know that deep down you still love your music and don't hide it and just sing it Let's get it together Cause music and that freakness of thinkin is pushing us further

got to get up and dance got to get up and move got to send out my message to the people

got to get up and dance got to get in the groove are you hearing my message to the people.
