

Natural, Will It Ever

Can you see me baby I'm right here
I hang around but you don't seem to care
I wish I knew just how to make a start
I've been waiting for too long to say where you belong

All I see is your face every where I turn

Will it ever be you and me
Will I ever be the one that you see
Will it ever come a time just right
To love you at first sight
Will you ever be my destiny
Will I ever be the one that you need
Will it ever come a perfect night
To love you at first sight baby

I can feel you baby in my heart
Flowing through my veins
Like a river of love
I might sound strange
I can't deny
I'm lonely in this prison
And you're the reason why

All i see is your eyes on every girl I meet

Will it ever be you and me
Will I ever be the one that you see
Will it ever come a time just right
To love you at first sight
Will you ever be my destiny
Will I ever be the one that you need
Will it ever come a perfect night
To love you at first sight baby

Ohh babe I'm wondering when you will (when will you come my way)when will you come my way

Will it ever be you and me
Will I ever be the one that you see
Will it ever come a time just right
To love you at first sight
Will you ever be my destiny
Will i ever be the one that you need
Will it ever come a perfect night
To love you at first sight baby

Will it ever be you and me
Will I ever be the one that you see
Will it ever come a time just right
To love you at first sight
Will you ever be my destiny
Will i ever be the one that you need
Will it ever come a perfect night
To love you at first sight baby
