

Nedelle, The Natural Night

Remember the sky all the planes with their lights
They tried to outshine the natural night
The static was so so bright, we couldn't believe our sight.
I was scared for you and I don't know why
Can I sleep in your shadow.
The desert went on and on
(Can I sleep in your shadow. Good Night)
And I have been gone too long
(Can I sleep In your shadow. Good night)
Good night
We battled the wintry Winds.
We put on our thickest skins.
You wouldn't have thought it was the middle of spring
Attempting to reconcile my tongue and my teeth for awhile
Proved my facilities were too helpless to speak
Can I sleep in your shadow.
The desert went on and on
(Can I sleep in your shadow. Good night)
And I have been gone too long
(Can I sleep in your shadow. Good night)
Good night
