

Negative, Better Without You

the nights are so long
This endless sleepless night
and something in me
puuttuu lause.

it's all in my head,
sometimes i can't forget
this can't be wrong,
i need some time,
i need some peace of mind.

Take me away,
but let my heart to stay
i need to feel depressive of your love
with me in to the place,
the place away from here
i need some time to myself away from you

that was a time when i
i was upsed and going insane
and i was begging you,
begging you to stay
you said: this
you need to find yourself again
but all i needed is some peace of mind
and you're not what i need.

take me away but let my heart to stay..
