

Negative Format, Downfall (Atmosphere)

As we come to this conclusion
Take away our true reaction
Brand our names in history
Radiate our deficiency

As you steal our animation
Take away our motivation
Smothering our human substance
Poisoning our will to function

You break
You kill
You take
My will

I am responsible
For actions that you'll never know
I am the instrument
When everything comes crashing down
I am responsible
For everything you think is wrong
I am the holocaust
When your mind starts breaking down

You let me down completely
Disappoint me in every way
Your future is a wasted notion
Your lucky your alive today

Strike you down with this conviction
You'll never see the light again
Drive your mind into the darkness
Fill your world with agony

I break
I kill
I take
Your will
