## Neil Diamond, Angel

Maybe tonight I will say what's on my mind But the words are oh so hard to find

When I try to speak It comes out like nervous chatter Then my knees get weak And I can't stop shaking

I try to relax, 'Cause I must maintain my cool She knows I'm here If I don't make a move right now She's goin' to disappear

Angel I never met a girl that looks like you Do-do-do do you even care

Angel There's nothing in the world That I won't do for you Angel

I followed you home And imagined me with you Girl, I should have known When I tried to dial your number I'd hang up the phone Angel, did you answer

Angel I never met a girl that looks like you Do-do-do do you even care

Angel There's nothing in the world that I won't do for you Angel

And every time we meet I feel like I got two left feet And you, You know what I'm goin' through

When I try to speak It comes out like nervous chatter Then my knees get weak And I can't stop shaking

Angel I never met a girl that looks like you Do-do-do do you even care

Angel There's nothing in the world That I won't do for you Angel

Angel I never met a girl that looks like you Do-do-do do you even care Angel
