

Neil Diamond, Love To Love

Love's a thing that needs wants to thrive on
Then it grows
At least that's what I've been told
You can't love someone
If you find that all you get in return
Is a heart that's cold

They say you need love to love
You gotta have love to love
They all say it works that way
But if it's true
Why do I love you

Seems like you keep tryin' to break me
You do things designed just to make me cry
And I've heard if warm lips don't touch you
Love won't grow no matter
How much you try

They say you need love to love
You gotta have love to love
They all say it works that way
But if it's true
Why do I love you

They say you need love to love
You gotta have love to love
They all say it works that way
But if it's true
Why do I love you

Why do I love you
Like I do
