

# Neil Young, Way

The way, we know the way. We've seen the way  
We'll show the way  
To getcha back home  
To the peace where you belong  
If you're lost and think you can't be found  
We know the way, we've got the way  
We'll lead the way  
To getcha back home  
To the peace where you belong  
The way, we know the way. We've got the way  
We'll share the way  
To bring you back home  
To the peace where you belong  
So many lost highways  
That used to lead home  
But now they seem used up and gone  
They sure had the magic  
When they were first found  
But not this road  
This road has never been closed  
It's still brand new  
The way, we know the way. We've seen the way  
We'll show the way  
To bring you back home  
To the peace where you belong  
If you're lost and think you can't be found  
We know the way. We've got the way  
We'll lead the way  
To getcha back home  
To the peace where you belong  
Where you belong, where you belong, where you belong  
We know the way  
To getcha back home  
To the peace where you belong  
When faceless and anonymous  
Come to beat down your door  
And say you're all washed up and done  
You can just say they have nothing in store  
To touch this soul  
Because they just don't know  
They just don't know  
The way  
The way, we know the way. We've seen the way  
We'll show the way  
To getcha back home  
To the peace where you belong  
The way, we got the way, we know the way  
We'll lead the way  
To getcha back home  
To the peace where you belong  
If you're lost and think you can't be found  
We know the way. We've found the way  
We'll share the way  
To getcha back home  
To the peace where you belong  
The way, we know the way. We've seen the way  
We'll show the way
