

# Nekromantix, Last Night I Saved An Angel

Another lonely night  
My life is passing by  
Without it  
Your time is up  
The moment is near  
I miss it

It fills me from afar  
It helps me get through another day  
I need it  
Each night I wish forever  
Just one escape to get away  
I want it

Last night I saved an angel  
I fixed her broken wings  
She made me do things I'd never done before
