

Nemesis 66, I Remember

You get inside my head, and I think of yesterday
I think of what we were, and it never goes away
I pop another pill to take away the pain
But now i'm dreaming more, and I guess your here to stay

I hit the lights, go out, there's laughter in my head
I try to shut it out with fears I'll end up dead
I hear the shots go by, it's the voices in my head
And now my time is up

This mass confusion has become a part of me,
I turn and run away, and I pray you'll never see
The clock hits 12 o'clock and the voice says in my head,
"We'll never make it here" - I swear that's what she said

I hit the lights, go out, there's laughter in my head
I try to shut it out with fears I'll end up dead
I hear the shots go by, it's the voices in my head
And now my time is up
