

# Nerv, Demons

I stay inside my head  
With voices I defend  
They are my only friends  
They'll stick it out with me til the end  
So sign your name, check in.  
We're all patients here

Picking up, picking up pieces of the old me that I needed  
I died and made you king so you could end my suffering  
Drink it up, dive off the deep end  
A part of me forever left bleeding  
There's no divinity inside the liquor's killing me

Say, don't you say that you need me right now  
Cause I can't think 'less I drink with these demons around  
I try to drown my pain and wash away every better part of me.

I stay inside my bed  
With skeletons I've fed  
They are my only friends they'll stick it out with me when I'm dead  
'Cause I lost my head  
But I'm

Picking up, picking up pieces of the old me that I needed  
I died and made you king so you could end my suffering  
Drink it up, dive off the deep end  
A part of me forever left bleeding  
There's no divinity inside the liquor's killing me

Say, don't you say that you need me right now  
Cause I can't think 'less I drink with these demons around  
I try to drown my pain and wash away every better part of me.

Would you say, would you say...  
Would you say you know me better?  
Do you see a better me?  
Do you see? Do I seem dead inside?  
Would you say, would you say...  
Would you say you know me better?  
Do you see a better me?  
'Cause I need to know if he's still around for me

Say, don't you say that you need me right now  
Cause I can't think 'less I drink with these demons around  
I try to drown my pain and wash away every better part of me.
