

# Neurosis, I Can See You

Did you see your people?  
They all turned out for you  
We were all together not so long ago  
In the shadows we can see you  
In the wind we hear your laugh  
When the light reclaimed you  
We were left clawing at the sky

In the oceans we can find you  
For the sun we praise your name  
In the dirt we pray for god to bring you back again  
I can see you, I can see you  
In the void the stones are turning and turning and turning

I can see you, I can see you
