

Never Shout Never, Bigcitydreams

You say we're both little people and you like it that way
But in time I'm gunna put this body to shame (and grow old)
Where a suit like my old man
Pack up all my things and get my tail out of town
We've got it good
Whether you like this town or not
I know it's small but with a big head
it's bound to get hot
In the summer
But the summer is a bummer
If you can't leave
This pathetic excuse for a town
That holds all your memories
A lifetime of crushes and your broken dreams
To be anywhere but here
But baby anywhere is away from me
If you got it all figured out
Then what is there to shout about
This midwest town is gunna miss you
Just go ahead and work it out
But first come on and let it out
Scream it shout tell everybody how your gunna leave
In about one year you'll have it all figured out
These big city dream are what you're about
Walking like stangers among these states
Only time will tell how long I can wait
We've got it good
Whether you like this town or not
I know it's small but with a big head
it's bound to get hot
In the summer
But the summer is a bummer
If you can't leave
This pathetic excuse for a town
That holds all your memories
A lifetime of crushes and your broken dreams
To be anywhere but here
But baby anywhere is away from me
If you got it all figured out
Then what is there to shout about
This midwest town is gunna miss you
Just go ahead and work it out
But first come on and let it out
Scream it shout tell everybody how your gunna leave
Me again oh so casually
Did you take the hit for me or the home team
If you got it all figured out
Then what is there to shout about
This midwest town is gunna miss you
