

# Neverstore, Out Of Breath

"Already getting old, no need to get worried,  
it's all under control, it's not really our problem at all"  
That's what people use to say  
They just care about today  
Why can't you open your eyes,  
Why can't you open your mind,  
Why can't you open your eyes  
Maybe that's all we can be:  
A life-eating-murder-machine  
It's all in your hands,  
This could be a last chance  
Almost out of breath and life  
And people all around the world is watching  
Almost out of breath and life  
And all over the world we're doing nothing  
So far beyond our needs,  
A welfare problem  
We read our magazines,  
But action speak louder than words  
What end justify the means?  
Reality - insanity  
Why can't you open your eyes,  
Why can't you open your mind,  
Why can't you open your eyes  
Maybe that's all we can be:  
A serial killer indeed  
It's all in our hands,  
This could be a last chance
