

# New Found Glory, Make Your Move

I know you're losing sleep over me  
I know you'll relive every moment  
Below sheets where dreams are made

I know you'll cover your eyes  
I know you'll quiver when fingers touch your side  
But it all coincides some way.

Move a little closer, hold me tighter  
I'll stay if you're gonna keep me in line  
Don't want it to be over, move move slower  
I'll stay if you're gonna keep me in line (in line)

I know everything reminds you of me  
Even the songs you thought I'd never sing  
I know you'll mess up your hair  
I know you'll do things you would never dare  
But it all coincides in some way

Now we're here, with the lights turned low  
You won't regret anything we do  
It's up to you, now make your move
