

# New Found Glory, Your Biggest Mistake

What do you think inside your head (i wanna know)  
so you think that this could end up (breaking you)

Your life is a timebomb set to explode  
You talk out your ass and everyone knows  
For once you should listen or care what i think  
Or i'll be gone before you can blink

Everyones told you over and over again  
Your making the biggest mistake of your life  
Everyones told you  
Everyone you left behind  
Your making the biggest mistake of your life

Everyone knows that your afraid of (missing out)  
And i know that its hard for you to (swallow down)  
A world you created set to explode  
You lie through your teeth and everyone knows  
For once you should take what im willing to give  
Or you'll stay stuck in the web that your trapped in

Everyones told you over and over again  
Your making the biggest mistake of your life  
Everyones told you  
Everyone you left behind  
Your making the biggest mistake of your life

It's a chance (what a chance)  
you should take (you take)  
And i know its not an easy one to make  
You should trust the ones that are closest to you

Everyones told you over and over again  
Your making the biggest mistake of your life  
Everyones told you  
Everyone you left behind  
Your making the biggest mistake of your life

You've made the biggest mistake of your life
