

# New Mexican Disaster Squad, I Don't Believe

I don't believe nothing is wrong

I don't relive my past  
I don't believe in much  
I don't believe in the system  
It never works the way it should  
I wanna hear about a livable world  
A world of purpose, a world of good  
But more it seems that reality has sharper teeth  
Is peace a dream?

I don't like people dying  
With hate muffling their cries  
I cannot find where I belong  
I don't believe we've learned from wisdom  
But can we learn from the school of regret?  
I'm afraid we'll always do it wrong

Belief is inside  
I'm swelling with pride

No I'm not, I'm just sick of the TV  
Can they see me inside?  
Where things never change  
But somehow decisions are made  
But we're the ones shoveling the shit  
And there's no end to it  
One more life denied  
So much for pride

I don't like people dying  
With hate muffling their cries  
I cannot find where I belong  
I don't believe we've learned from wisdom  
But can we learn from the school of regret?  
I'm afraid we'll always do it wrong

I don't believe this fragile cell of information  
I don't believe this frequency of agitation  
I don't believe what you tell me  
What you sell me
