New Model Army, Running In The Rain 1983 Pro

We were singing in the rain

Like we invented singingThere's a light in the sky

From a million street lights

And we danced all the steps

From all those old time movies

Rolling down the hill

With laughint hearts

In Poison Street the guard the gates

With bitter, bitter tongues

In Poison Street we'll laugh out load

Till the shadow go melt away

And I love you now

Like I love you always ever

Kissing in the dark

Like a couple of Kids

You gave me life

You gave me light and thunder

Like a blind man sees

For the very first time

In Poison Street we'll go cracking

Through the walls that history made for us

In Poison Street we'll spring the traps

And race away

So just a Kick

For this dark damned city of ours

And a kiss

Yeah a kiss for you

And just a drink

A toast to the days to come

Now Poison Street won't break us anymore

We were singing in the rain

Like we wrote that song

There's a light in the sky

From the streetlights all around

You gave me life

You gave me light and thunder

Like a man makes fire

For the very first time

In Poison Street...
