

# New Years Day, So Long

You should have known that you'd be here again  
Making the same mistakes  
For the same reasons  
Not everyone deserves a second chance  
Why are you so in love with bittersweet romance?

It's alright  
It's ok  
I'll still be here when all of this is over

So long  
Goodbye  
Now just fall asleep  
To this lullaby  
That i'll sing to  
To you every night  
I know your world's a mess but everything will be alright

I should have known that you'd be here again

Why do broken hearts hold on to broken friends?  
Not everything that's good was meant to last  
But if it never was, it never had a chance  
(you never had a chance)

(Chorus)

I know your world's a mess but everything will be alright  
(now just close your eyes and kiss them all goodbye)  
I know your world's a mess but everything will be alright  
(so just close your eyes, just close your eyes)

So long  
Goodbye  
Now just fall asleep  
Like you do every night  
And when you wake up  
I'll still be by your side  
I know your world's a mess but everything will be alright
