

Newcleus, I'm Not A Robot

See that boy with his head in the sky
Spends his days and his nights gettin' high
What he's searching for is how to be free
what he finds is that he's lost hold of reality

See those people on the corner each day
Idly watching as their life slips away
What they don't ever take time out to see
Is they can be whatever they wanna' be

-You're not a robot
-You're not a robot
-You're not a robot
-You're not a robot

What is necessary to understand
Is how they think they've got our lives pre-programmed
To break their mold you must remember this key
Don't ever lose your sense of individuality
When they try to tell me how I should live
How much I can take and how much to give
Whatever tricks they use or catches they try
They can't stop me from living my life as mine

-I'm not a robot

-I'm not a robot
-I'm not a robot
-I'm not a robot
