

Nichya, Start over

We can start it all over
Call me over
Come over
And I'll show you the answer
But if you touch heaven
You won't ever
Have a chance to make it
To where you once were
It's been taking forever
Longer than ever
And it's your heaven
I'm not sure i can enter
Make a step forward
Call me over
See the target before you
With my heart in the centre
You can try it on me
You can try me out
You can try harder
You can try again
You can try it on me
You can try me out
You can try harder
You can try again
Now, we can start it all over
Call me over
Come over
And I'll show you the answer
But if you touch heaven
You won't ever
Have a chance to make it
To where you once were
Now the heart's beating louder
Come on, hit harder
Feel the gun powder
It's the war that we live in
It's the time we've been losing
From the very beginning
No one is winning
No one is willing
Should you try it on me
Should you try me out
Should you try harder
Should you try again
If it's hurting too much
If it's not allowed
Make a step forward
Make this pain over
Should you try it on me
Should you try me out
Should you try harder
Should you try again
If it's hurting too much
If it's not allowed
Make a step forward
We can start it all over
