

Nick Cave, We Came Along This Road

I left by the back door
With my wife's lover's smoking gun
I don't know what I was hoping for
I hit the road at a run
I was your lover
I was your man
There never was no other
I was your friend
Till we came along this road
Till we came along this road
Till we came along this road

I ain't sent you no letters, Ma
But I'm looking quite a trip
The world spinning beneath me, Ma
Guns blazing at my hip
You were my lover
You were my friend
There never was no other
I hope you understand
Till we came along this road
Till We came along this road
Till We came along this road
