

Nicotine, Aquarius

Aquarius
Under the sun
The dehydrated world
All i want is a bottle of water
Right in the middle
Of an old ghost town
Up in the sky
Something's shining

The sun is up on the mountain
I wanna know the location
And direction
I've been lost on my way
The I look up and read
The constellation
Aquarius

She is my angel
She always tell me
What is wrong, what is right
What is left and what is right
I still believe in the sign she gave me
I don't wanna use my compass
'Cause I know she's tellin' me the way

Aquarius
Under the sun, the dehydrated world
All I want is a bottle of water
Right in the middle of an old ghost town
Up in the sky
Something's shining

Aquarius, aquarius, aquarius

Get the star from the constellation
Points me to the right direction
Wanna catch a ride on the galaxy
Celestial dreams for you and me

She is my angel
She always tells me
What is wrong, what is right
What is left and what is right
I still believe in the sign she gave me
I don't wanna use my compass
'Cause I know she's tellin' me the way
