

# Nicotine, I Wanna Be

We never thought about the future  
We only thought about this moment  
The day you placed your heart in my hands,  
I became your future, with no hope  
Never meant for you to be my first one  
First love is always first forgotten  
Didn't mean to kill your pet canary  
I can never bring it back, don't panic!  
If we tried we'd only lie and steal,  
More pain we gotta feel  
You're in my head  
I wanna be, I wanna be  
The only thing you see at night  
Until your memory has gone  
I wanna be, I wanna be  
Your favorite power tool  
Until I'm satisfied  
I'd hate to think tonight, it's finally over  
All the things we do must have some meaning  
I must have meant to kill your pet canary  
The orange cat and later on the little white dog  
I'm snuffin' out their memories  
I scream, they scream at you  
They're in my head
