## Nields, Snowman

I don't feel much like dancing You scrape the ice off my glances We walk through a cold and moonless winter night You recognize the coal in a snowman's eyes

Chorus It's all right, it's okay, if I freeze I can't decay You touch and I freeze, there is ice where my heart should be I'm a snowman, cold is all I understand I'm a snowman, if you can't hurt me no one can

Everything is fine Nothing changes but the time Life is easy when tomorrow's gone I dream of snow, snow's where I belong

Chorus

And I must have a mind of snow To stand and watch you as you go And then turn to see this empty scene And still not feel a thing

Chorus
