Nina Hagen, My Sensation

My heart is full of love and affection
In time I'm looking for a brand-new erection
Oh yes, I need your sweet inspiration
You change again and move from station to station
Thank God I got rid of my old affection
Sometimes I'm seeking for total perfection
Yes, I need your sweet inspiration, uh huh
And then I satisfy the nation

Yes, you are my main attraction
You give me all my sexual erection
We're having fun when we are in action
What a gift, to give satisfaction
It's been so tough without your love
I can't be glad, don't give me that
I need you now, 'cause anyhow
I love you so, don't tell me no, no!

I want your lips, I want your heart
Oh baby baby, hold me tight tonight
Oh yes you are my most perfect connection
Because I really need your kind of protection
And I want you to get my information
It's for your personal salvation
This is a hot and spicy situation
I get my kicks off sensing your vibration
It's for my spiritual unification, uh huh
And God knows that you're my sensation

Yes you are my main attraction
You give me all my sexual erection
We're having fun when we are in action
Oh what a gift, to give satisfaction
It's been so tough without your love
I can't be glad, don't give me that
I need you now, 'cause anyhow
I love you so, don't tell me no, no!

I want your lips, I want your heart
Oh baby, baby hold me tight tonight

My deep caress in such a hot location
It's waiting for your next revelation
I'm sure you're digging all my stimulation, uh huh
???? through me a generation
This is a hot and spicy situation
I get my kicks off sensing your vibration
It's for my spiritual unification, uh huh
And God knows that you're my sensation

Yes you are my main attraction
You give me all my sexual erection
We're having fun when we are in action
What a gift, to give satisfaction
It's been so tough without your love
I can't be glad, so don't give me that
I need you now, 'cause anyhow
I love you so, don't tell me no, no

I want your lips, I want your heart
Oh baby, baby hold me tight tonight...
