Nine Inch Nails, Gave Up (Remix)

Give it to me I throw it away
Give it to me I throw it away

Covered in hope and Vaseline
Still cannot fix this broken machine
Watching the hole it used to be mine
Just watching it burn in my steady systematic decline
Of the trust I will betray
Give it to me I throw it away
After everything I've done I hate myself for what I've become

Give it to me I throw it away
Give it to me I throw it away
Throw it away

It took you to make me realize
It took you to make me realize
It took you to make me realize?
It took you to make me see the light
It took you to make me realize
It took you to make me realize
It took you to make me realize?
It took you to make me see the light
It took you to make me realize
It took you to make me realize
It took you to make me realize?
It took you to make me see the light
