

# No Doctors, The Quarry

My eyes rise no surprise marsupials gather round  
Pulled that sink right off of my head it made a whistle sound  
Which side divide no place too high for me or me for them  
If I go so slow in my car hold fall behind me once again  
Lunge with a bite but I feel alright and the quarry moves on

Heard the coach release the smoke yeah I put that cloak back on  
Webster lied when he rose that tide but I never had a wand  
Filthy filter quite off kilter saw her moonlit clit  
Dove inside with so much pride I landed in a pit  
Home on the range don't it feel kinda strange and the quarry moves on

Split lip bit my tip and I washed my balls off clean  
Sandman cries I would advise you question what I mean  
No I didn't pen this tune too soon to hypnotize  
Sealed the lid now tell me kid how much your peso buys  
Back in the game and you know my name and the quarry moves on
