

# No Fun At All, Beach Party

There is a place where reality is wrong  
And I know because I've been there  
Where plastic people live their plastic lives  
And I know because I've been there

I need to understand  
Why everyone around  
Me is telling lies  
I need to understand

I have to try to understand  
Try to gather all my thoughts  
But when I'm close they always are shattered  
I don't know where I stand

There was a time where I didn't really care  
And I thought I had the answers  
I went around wearing a delusive face  
And I thought I had the answers
