

No Motiv, Life Goes On

Out on a one way street again
I'm taking fire in each direction
Can't see the light down at the end
It's getting cold and there's no action

Maybe it's the only way
Anyone can live life day to day
Fight to see through the rain

You'll be alright take it easy
Don't let these hardships bring you down
Because times like these will come around
Believe me things will be ok

I'm taking heat from all around
I'm given no respect for reverie
Can't find a truth without a doubt
Sorrow's arms are now around me

Maybe I should abandon what I said
Maybe I should quit while I'm ahead
To get out of this hole I'm in

You'll be alright take it easy
Don't let these hardships bring you down
Because times like these will come around
Believe me things will be ok

You'll see the stars keep shining down
You'll know the world keeps turning 'round
You'll find that time keeps passing by
Along with the chance to try
So why not make it worth your while
And see that life goes on

Believe me things will be ok
Life goes on
