

Noah Weiland, 2 Nights

I spent two nights in your bed now I can't get you out of my head
I don't know after last night if things will be the same again

She just,
Touchdown, LAX
She's on the way to my crib in an UberX
Can we,
Take shrooms, and go to a rave
Then we can fuck & be lazy the whole next day

But I don't wanna fall in love
Been down this road more than enough
And I just wanted to have fun
Thinking bout you more than anyone

I spent two nights in your bed now I can't get you out of my head
I don't know after last night if things will be the same again
We were rolling off a molly the first time that we had sex
Think she has a boyfriend back at home but I could really care less

And I know,
You don't like to take things slow
Another half a pill up my nose
And I'm so
Down for more
Let's go

So tell me would you miss me
After you pack you bags leave the city
Babygirl can you lick me
Kiss my neck, baby give me hickies

I spent two nights in your bed now I can't get you out of my head
I don't know after last night if things will be the same again
We were rolling off a molly the first time that we had sex
Think she has a boyfriend back at home but I could really care less
