

# Noam, A World Without Danger

There is a world, that is virtual and different  
It can be so cold, it makes us stand up for what's right  
Our hope through our life, is if we reset it to the start

Here we are, Going far  
To save all that we love  
If we give what we got, we will make it through  
Here we are, like a star  
Shining bright on the world, today!  
Make evil go away!

Code Lyoko, We'll reset it all  
Code Lyoko, Be there when you call  
Code Lyoko, We will stand real tall  
Code Lyoko, Stronger after all

A world of machines, it can shadow human nature  
And all that we need, is the way to find the answer  
One thing's sure  
You can count on us for good

Here we are, Going far  
To save all that we love  
If we give what we got, we will make it through  
Here we are, like a star  
Shining bright on the world, today!  
Make evil go away!

Code Lyoko, We'll reset it all  
Code Lyoko, Be there when you call  
Code Lyoko, We will stand real tall  
Code Lyoko, Stronger after all

We'll do our best  
To never let you down  
We're up to the test  
To turn this world around

Here we are, Going far  
To save all that we love  
If we give what we got, we will make it through  
Here we are, like a star  
Shining bright on the world, today!  
Make evil go away!

Here we are, Going far  
To save all that we love  
If we give what we got, we will make it through  
Here we are, like a star  
Shining bright on the world, today!  
Make evil go away!
