

# Noctiferia, Out Of Play

I play a variety of roles which are slipping through my tired fingers  
I am out of play  
every trial hits another nerve  
every character has a pointless point  
my function was never accepted or it wasn't expected to have spirits  
that dictate integrity feeling which provoke insanity  
now I am sick of taking part of another fictitious sample  
I am out of play spirits  
that dictate integrity feelings which provoke insanity  
empty soulless screen  
I am fear machine  
I am the last act created and failed  
I am out of play
