

# Nocturnus, Andromeda Strain

Modern warfare of today  
Brings forth a new technology  
Killing through Scientific means  
Destroy the world with technology  
Now we'll see what is to be  
Inescapability

Cloud masses concentrate  
Osmosis fills the sky

Scattered remains,bodies left to decay  
On this disease stricken earth,plague of Andromeda Strain

Affected by the gas  
Reduce them to subhuman form

As i glimpse at,swelled up corpses  
infested with, radiated insects

Global chaos-Mass confusion  
The conclusion-Of a dying world

Mankind death is close at hand  
The world is hanging by a strand  
The key to an obliterated land  
No one seems to understand
