

Nocturnus, Subterranean Infiltrator

Release me from the sky
onto marsh domains
Expose the parachute to
Ease - the - vicious fall

Unseen by those below
Preying on their blindsights
shadows dance
About - the - jungle bog

Agent of espionage
Bearing north of the peninsula
Invitation to lay clear
Think - over - the strategy

Advance into forbidden marsh
scope all in the infrared
Create offensive
Resistance - from the - river banks

Searching,

Entering the concealed passage
corridors extend beneath the surface
Manoeuvring through the
radar - beams - alarm reaction

Progression is slow under canister discharge
targets locked at the ends of the turns
Awaiting any enemy to
approach - infrared - identification

Once inside the target's range
seize the moment by squeezing the trigger
Single lead injection
intentions to wound - not to kill yet

Movement gives away strategic position
A regiment responds to the action
Trip wire set, suckered into the trap
They lay decapitated

Explosions
