

# Nodesha, Almost There

It's so amazing the way you speak directly to my heart  
Without ever saying  
A single word  
Eyes tell it all  
Whenever you're near my body breaks out in chills  
Must be passion taking over  
Cuz my world stands still to love you

## CHORUS

One more sweet kiss from your lips  
One more touch across my skin  
One more moment spent with you  
Brings me closer to the truth  
If I'm not in love just yet  
I'm almost there  
I'm almost there (I'm almost there)

I can feel the symptoms  
The see the signs that say I'm on the edge  
And you push me over  
With every heartbeat I'm slowly sinking in  
It's so surreal  
I think it all must be a dream  
It feels so good to have you in my life  
You're always there for me when I need

## CHORUS

One more sweet kiss (sweet kiss) from your lips  
One more touch (one more touch) across my skin (yeah)  
One more moment spent with you (spent with you)  
Brings me closer to the truth (the truth)  
If I'm not in love just yet  
I'm almost there (I'm almost there)

It's tapping me on my shoulder  
It's standing right at my door  
It's even got me talking to myself  
Saying "what are you waiting for?"  
Cuz the more that you show me your heart  
The closer we become  
And I'm not afraid  
Just do one more thang  
Then I know deep down in my heart  
I'm yours

## CHORUS

One more sweet kiss from your lips (from your lips)  
One more touch (I love to feel your touch) across my skin (across my skin)  
One more moment (and I just love every moment) spent with you (I spend with you)  
Brings me closer to the truth (oohh whoa whoo ohh no)  
If I'm not in love just yet  
I'm almost there

Your sweet kiss I can't resist  
Your touch across my skin  
My body's breaking out in chills  
I can't believe how good I feel

One more moment (one more moment) spent with you (spent with you)  
Brings me closer to the truth  
If I'm not in love just yet  
I'm almost there  
(There oohh ooh)  
I'm almost there

(You're pushing me over)  
I'm getting closer  
I'm almost there
