

NOFX, Gonoherpasyphililids

Sitting in a room waiting for some news

Sitting in a room with white knuckles

Not feeling so good

I didn't do the things I should

I said, "doc, tell me what's wrong with me";

He had this expression he didn't know what to say

"it seems that you've contracted a new strain.";

How could this happen to me?

Another victim another casualty

From f**king casually, another casualty

All the times I should have worn a jimmy hat

All the times I said, "what the f**k,

I won't look back, that's not for me.";

I wouldn't listen to reason

Now look at me
