

NOFX, Just The Flu

Looking back to the past,

predictions of the end

Unseen ultra violet rays

are beating on my head

Nuclear threat wanna bet will be our demise

The day will come when we'll look to apocalyptic skies

When the news had spread, that soon we'd all be

dead

Well it just blew our minds

No one could have guessed that our worst fears at

best

Figments of our time

So it seems that our dreams will never come to be

How could such a stupid thing destroy humanity?

A few weeks till extinction and there's nothing we can

do

A message sent to other worlds will say, "It was just the flu"

There's no lesson to be learned

There's no one left to learn it
