

# NOFX, Total Bummer

Go away sunny day  
All the horny people sitting in front of their TV and thinking  
What is wrong with me I'm not a monster  
Why won't anybody fuck me  
I don't wanna live life lonely  
Why does everyone have to be perfect

Go away sunny day  
All the barflys sipping whiskey  
Fighting ever present pity  
Wondering what they are sucking back for  
Is it the drink or trepidation,  
Watching all trains leave the station  
Left standing alone without a ticket

You light up my life  
You give me hope to carry on  
You light up my days  
And you light up my life

Go away sunny day  
Stop searching cause there's no answer  
Just a long line of disaster  
There's no simple way to stop the sadness  
Life's not fair I'm glad it's not  
This isn't heaven just a lonely planet  
On the verge of self destruction
