

# Nonpoint, Hive

...Go... It's time  
To do a quick rewind  
And find another line  
And bring it back to get  
The juices flowing You  
Found infection  
With injection  
Tell me lies  
Time is moving faster  
You were the last one  
To reach inside  
And grab my soul and kill it

Now you realize  
What you've done  
Now you realize  
What you've done  
Your time has come  
Go...  
Pick it up pick it up pick it up

Heart beats  
Pains inside  
You wonder why  
You can't breathe  
You're about to see  
Your maker's eyes  
That breath you took  
Was terminal.

Now you realize  
What you've done  
Now you realize  
What you've done  
Your time has come  
Go...  
Pick it up pick it up pick it up...

Here we go  
Oh girl  
Take my hand I understand, I understand  
You got it right there  
Oooh girl it's the right time  
I feel you're taste you're feeling so fine  
So fine soft white skin  
The air the color of sunsets  
Kiss your neck  
The tone is all set  
You tell another lie  
You're flyer than the girl I had before  
Then I kiss your bottom lip and  
Have you screaming for more  
Close the door  
And hope that nobody's home  
And when you wake up I'll be long gone
