

Northstar, Blackheart Valentine Pill

Knock the ice up off my bed
Cut back your hand, cut back so i can
Bleed a little smile,
That's all that's left when heaven splits in two
On a bridge a phantom love
Kiss and shove
Have i slept it off?
I've been awake for too long

All this time
There's a hole in my ceiling where dreams escape
(Right above my head)
I'll take a holiday
I'm sick of feeling this way..

So just cut off the lights awhile
and kiss me like you wanted to
Then i'll sing in style
Like a black heart valentine pill
I need it but just keep it
I have slept it off
and i've been awake for too long

All this time
There's a hole in my ceiling where dreams escape
(Right above my head)
I'll take a holiday
I'm sick of feeling this way

Well what did it say?
I forgot to read the label
I forgot to read the label
I forgot what it said
But i need it cause i'm not sleeping anymore

And i will breathe my hands will shake
Please blow a kiss for heaven's sake
Her martyr's smile that's plastic and fake
I'm classic and late
I'm plastic and fake
