

# Northstar, Digital Me

hailstons and lead  
is what my voodoo doll embeds  
but i got this toy, so much bigger than this  
and when you wish on it  
you get your three clicks  
hey pretty air  
take me somewhere.

someone just paint it red  
my blinking neon chest  
catch a curse or two  
so i can head a whisper in my bed

don't you like the peace?  
that fights you when you're on your knees  
i'm just an island that floats around on stares  
a digital window  
an adandoned fare  
hey pretty air  
tie my feet  
where they become a pair

someone just paint it red.  
my blinking neon chest  
catch a curse or two  
so i can hear a whisper in my bed  
let down your hair and swing with me instead  
up the stairs to the party of the dead

we'll party like we're dead

someone just paint it red.  
my blinking neon chest  
catch a curse or two  
so i can hear a whisper in my bed  
we can watch them dance on my hands  
someone just drink with me instead
