

Nosferato, Over

We've talked about these times before
But it seems like you don't think
Don't think about it anymore
And I thought we made a promise
Now you're standing down with my best friend at the door

Just when I thought it was over
You let me fall with my face down
Just when I thought it was over
You kept fooling around

So we made a thousand promises
I would do this, You would do that
And all kind of that crap
Do you know what makes it harder?
I can't find, no one who is better to you

Just when I thought it was over
You let me fall with my face down
Just when I thought it was over
You kept fooling around

We had so much to do
And we as we know
Oh yeah, oh no
So I picked up the phone
To call you at home
But you weren't there
And I alone

Get it over
I can't get over x2

Just when I thought it was over
You let me fall with my face down
Just when I thought it was over
You kept fooling around
