

# Nouveaux, Never See The Day

I remember just like it was yesterday  
When I could always find a smile on your face  
And now we're standing underneath a different sky  
You wish upon your star and I'll wish on mine

Somehow inside, I feel the presence of your absence  
From the pouring rain

If a star fell from the sky  
Every time I thought of you  
There would be none  
And if the moon would shine  
All the while you're on my mind  
We'd never see the day  
And I wish you weren't so far away

Pray tomorrow's gonna be a better day  
Just like yesterday when you were here  
I could find my smile down on memory lane  
And you could reach from where you are and dry my tears

Somehow inside, I feel the presence of your absence  
From the pouring rain

If a star fell from the sky  
Every time I thought of you  
There would be none  
And if the moon would shine  
All the while you're on my mind  
We'd never see the day...

If a star fell from the sky  
Every time I thought of you  
There would be none  
And if the moon would shine  
All the while you're on my mind

If a star fell from the sky  
Every time I thought of you  
There would be none  
And if the moon would shine  
All the while you're on my mind  
We'd never see the day  
And I wish you weren't so far away
