

# Novalis Deux, World In Flames

Thousand years to walk  
Thousand years to search my love  
From south to the north  
From east to the west

One million miles  
Through fire and ice  
From heaven to hell  
From moon to the sun

The world stands in flames  
Confused human race  
Thousand years to walk  
Thousand years, thousand moons

The world stands in flames  
Confused human race  
Thousand years to walk  
Thousand years, in search of you

When I walk over fields  
The wind sings a symphony  
When the angels rise  
From the earth up to the sky

As long as my heart beats  
I will follow her line  
The stars are my friends  
I'll never give up

The world stands in flames  
Confused human race  
Thousand years to walk  
Thousand years, thousand moons

The world stands in flames  
Confused human race  
Thousand years to walk  
Thousand years, in search of you
