

# Novice, I Could Say

desolate, empty, distracted, and wrong  
the people we love are the people we hurt  
backwards and needy change  
we take what we can  
but never giving anything  
and harsh words get old but never stop cutting  
through your soul is bleeding  
through thick and thin  
through better for worse  
these words are still somewhat rehearsed

if i could say anything now  
just three words i can't leave out  
all alone in the world  
when you're sitting here next to me

forget what you wanted, its not about you  
you made the choice, so its your job to see it through  
divide the shoing finding someone new  
its not the answer to your problems  
the problem is you

if i could say anything now  
just three words i can't leave out  
all alone in the world  
when you're sitting here next to me

you're not hopeless  
i see so much more in you than you see in yourself  
things can get better if you only let me in  
its time to surrender

if i could say anything now  
just three words i can't leave out  
all alone in the world  
when you're sitting here next to me
